SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence graduating in 2026 with hands-on experience in Python, FastAPI, Generative AI applications, AI agents, REST APIs, MongoDB, and backend development. Strong foundation in LLM integration, prompt engineering, RAG-based applications, software engineering, cloud computing fundamentals, microservices, Docker, Git, and scalable API development. Passionate about building production-ready AI applications, deploying intelligent agentic systems, and collaborating with cross-functional teams to deliver enterprise AI solutions.

EXPERIENCE

Data Science Intern

Aug 2025 – Feb 2026

Labmentix

- Developed Python applications and automated workflows for AI and data processing tasks.
- Built backend services to process structured and unstructured data efficiently.
- Debugged, tested, validated, and optimized Python applications to improve reliability and performance.
- Collaborated with cross-functional teams to deliver scalable software solutions and technical documentation.
- Used Git for version control throughout the software development lifecycle.

PROJECTS

Smart Helpdesk with Agentic Triage

May 2025 – Jul 2025

- Developed an AI-powered helpdesk application using FastAPI and Python for intelligent ticket classification and routing.
- Implemented LLM-powered workflows, prompt engineering, and agentic reasoning for automated issue handling.
- Built REST APIs and integrated MongoDB for scalable backend services.
- Improved application reliability through debugging, testing, validation, and performance optimization.
- Managed project version control using Git and followed modular software engineering practices.

Email AI Application

Mar 2025 – Apr 2025

- Developed a GenAI-powered email assistant using Python for email classification and automated response generation.
- Integrated Large Language Models through prompt engineering and API-based workflows.
- Built REST APIs using FastAPI for seamless backend communication.
- Performed debugging, testing, validation, and backend optimization while maintaining the project using Git.

Chatbot Application

May 2025 – Jul 2025

- Built an AI chatbot using FastAPI, Python, MongoDB, and LLM integration.
- Designed scalable REST APIs for communication between backend services.
- Applied prompt engineering and conversational AI techniques to improve response quality.
- Improved backend performance through debugging, testing, optimization, and modular architecture.

EDUCATION

Bachelor of Technology (Artificial Intelligence)

2022 – 2026

Mahindra University, Hyderabad

CGPA: 6.0/10

Relevant Coursework: Artificial Intelligence, Machine Learning, Database Management Systems, Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering.

SKILLS

Programming: Python, SQL, C, C++

AI & Generative AI: AI Agents, Prompt Engineering, Retrieval-Augmented Generation (RAG), LLM Applications, OpenAI API, Hugging Face, LangChain, Vector Databases (Basic), Tokenization Concepts

Backend Technologies: FastAPI, Flask, REST APIs, GraphQL, Microservices

Databases: MongoDB, SQL

Cloud & DevOps: Docker, Git, GitHub, Cloud Computing Fundamentals, CI/CD Concepts

Tools: VS Code, Jupyter Notebook

Concepts: API Integration, Backend Development, Software Engineering, SDLC, Debugging, Testing, System Design Fundamentals, Scalable Application Development

ACHIEVEMENTS

- District-Level Badminton Player.
- Developed AI-powered applications using Python, FastAPI, REST APIs, MongoDB, LLMs, and prompt engineering.
- Built intelligent backend systems involving AI agents, GenAI workflows, API integration, debugging, testing, and software optimization.
- Strong interest in Enterprise AI, Generative AI, Agentic AI, Cloud-Native Applications, and Scalable AI Engineering.
